

# Finally. Class-E™

Now there's a case that accommodates style. The Alkeron Class-E™ is modern, minimalist, and won't impose someone else's idea of style onto you. It is the very idea of style and anyone can feel comfortable integrating a Class-E™ chassis into their theatre, home or office décor. It's created from a sturdy steel frame with a brushed aluminum front panel to house all the necessary componentry for your HTPC, IPTV set-top-box or dedicated application project or product. Black is also available.

## More than a pretty face.

The Class-E™ is ready to support your HTPC or special workstation/media platform. It doesn't waste space on unneeded expansion or might-use components but instead focuses simply on getting the job done. It includes an integral 65W power supply, an IR Receiver, pre-drilled mountings for mini-ITX, and safety certifications and our own warranty. After that, like any pretty face, the rest is up to you.

## Reasonably Priced.

There's cheaper cases and more expensive cases, but few that offer equivalent value. Alkeron's Class-E™ cases are made with highest quality standards in mind and provide reliable and warranted performance for a fair price. The cases are available in unit quantities from Alkeron distributors and resellers. Bulk order discounts are available for volume purchases and volume resellers.
